

**Material:**

The main materials of welded mesh rolls are low carbon steel wire and stainless steel wire

**Assortments available**

	<p><b>Light Welded Mesh Roll</b></p> <p>Light welded mesh not only provides a solution for countless problems but also guarantees consistent top quality. Manufactured in rolls, using wire diameters of 0.66mm to 2.00mm, there is a choice of finishes including plastic coated.</p>
	<p><b>Heavy Welded Mesh Roll</b></p> <p>The use of heavy welded mesh roll in industrial environments is constantly increasing, particularly in the areas of safety, security, storage and for building and construction. Heavy weldmesh is easy to work with and is easily combined with other materials. This makes the mesh multi-functional and can be used in all types of construction.</p>
	<p><b>Special Welded Mesh Roll</b></p> <p>This kind of welded mesh roll is mainly used in construction, fence for zoo and poultry, safety guard on machines, fencing mesh of highway, sport ground, guard mesh of the road . It can also be used as concrete reinforcement bar in construction, road and bridge.</p>

**Characteristics:**

This kind of welded wire mesh roll has flat even surface and strong structure, therefore it can offer a long service life for many years.

Welded mesh rolls offer excellent properties such as corrosion resistance, acid resistance, alkali resistance, aging resistance, oxidation resistance, sunshine resistance and weather resistance.

**Application:**

Rolled welded wire meshes are widely used in industry, agriculture, construction, transportation mining and so on.
